

Energy Advisor Enterprise

The Energy Advisor Enterprise package provides customized and comprehensive customer engagement. Enterprise delivers Apogee's basic energy calculator with the addition of many value-added features.

Features:

- Customizable recommendations to promote programs or products
- Recommendations with expense and difficulty ratings
- Integrated special purpose calculators, rebates, and videos
- Energy Forecast displays the weather's impact on energy costs
- Dollarize the degrees with our Interactive thermostat
- "Homes like mine" comparison

ENERGY ADVISOR ENTERPRISE

WAYS TO SAVE

Save up to \$361/year

Insulation Upgrade:

Installing ceiling and floor insulation can save you up to \$361 a year.

EnergyWise Attic Insulation Program

Receive up to \$300 towards upgrading your attic insulation by participating in this EnergyWise program.

Filter

- Low Cost (6)
- Long Term (7)

Clear Filters

Save up to \$288/year

Programmable Thermostats:

Your best money saving tip is using a programmable thermostat. It can save you as much as \$288 a year by holding 68°F for heating and 78°F for cooling when you are home and automatically setting to 55°F for heating and 85°F for cooling when you are away. Caution: Older heat pumps should only be adjusted by 2°F for heating to avoid trigger the emergency heat mode.

Save up to \$112/year

ENERGY STAR & Appliances:

If you change out your older major appliances in your house to Energy Star® appliances, you could save up to \$112 a year.

EnergyWise Cooling System Tune-Up Program

Get \$30 for Residential Cooling System Tune-Up with this EnergyWise rebate.

Save up to \$189/year

Cooling Setting:

If you raise your cooling setting from 75°F to 78°F, you could save as much as \$189 per year.

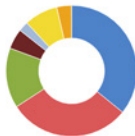

Save up to \$14/year

Weatherize Your Home:

If you caulk around your windows and doors, make certain the weatherstripping on your doors and windows is tight, weatherstrip your attic door, and take other actions to seal your house further, you could save up to \$14 per year.

UPFRONT COST

DIFFICULTY

If you have your house professionally weatherized, you could save up to \$122 a year.

Improving the shell of your home to reduce drafts and increase the insulating characteristic of your windows, walls, ceiling and floors can make a big difference in your comfort and operating costs. But, knowing specifically where the biggest changes are for the least cost can be challenging. In general, check first to be sure your windows and doors are closing tightly. If you can hear street noises easily that is a sign of significant leaks. Use weather-strip designed specifically for these areas as a do it yourself project. In general, you will be surprised how much a difference this makes. The next step for most homes is to consider putting more insulation in the attic since it too can be a do it yourself project. Good rules of thumb are available here: https://www.energystar.gov/index.cfm?c=home_sealing.hm_improvement_insulation_table
